Subject: Letter to the Governor

This is to just about anyone in montana I could possibly think of who could keep our Children from being abused, beat, molested, killed all of the ways they are being exploited in this State by their abusers under the leadership of You, Governor Bullock and those you oversee in the Department of Health and Human Services. I told you this summer, Governor that more Children would die, probably in the Fall if you did

GRANDMOTHER'S LETTER

nothing about this terrible problem we have with this department. You seemed so nice, so willing and understanding, and like a fool I believed you.

We told you of our dead Children. Of Darby and Kiera and of poor October who under the supervision of Oppen, Corbally and especially Cory Costello was made to go home to her mother and mother's boyfriend with two broken arms, pulled out hair, bashed in teeth to soon be killed. We told you.

We appealed to any fatherly instincts you have as a Father and future Grandfather that unless you used your authority this would happen again and in the years to come would get worse and happen again and increase in frequency, this slaughter of our children with the consent by legal oversight of this deadly department, and what did you do? Put THE problem on this board that will make sure these Children are kept safe.

I'm sorry but What were you thinking? We have proved to you over and over that she is most of the problem! We thought you would do what governor with a reasonable mind would do and relieve her from her duties. We were floored that you put her on this commission. I was sick to my stomach that you could make this decision that to me is very negligent and you had the chance to make a good choice, possibly saving lives and you completely dropped the ball.

Let me try and again....tell you why this person and her supervisors Oppen and Runkel should be relieved of their positions. Since 2009, the child abuse death rate has gone up in this state 45 percent and in Cascade County alone has gone up 100 percent. Since Corbally was hired the state's abuse death rate has gone from one of the lowest in the nation to right up there with the "Big Boy" states. With her leadership came the means to bring an atmosphere of a workplace that was pleasant, with teamwork and a goal of helping to keep families and children safe to a workplace of intimidation by supervisors, including being yelled at, of being sworn at and when decisions made by these workers and counsellors are good decisions and right for these families, if these rogue supervisors don't agree for whatever reason, are encouraged to quit, fired or just leave as they have more ethics and scruples than to stay in this warped agency. I have heard terrible stories of retaliation against parents, workers, kids, terrible things and I'm just st one person! But when these facts are shown to you in documents, testimony, photos of drugs being used by these people and neglect and child abuse in the families of these people who are in control of our own Children, you just excuse, dismiss, coverup and make it all magically go away by spending MORE of our money by developing a commission, a new job to see why this agency doesn't work and making that person under the supervision of the person that created the problem in the first place.

So instead of me explaining each case I'm just going to name the instances of where you have gone wrong...just lately.

Patsy and her boys are still in hiding so they won't be sexually abused although the supervisor gas tried his hardest to get his way to sooth his sore ego as the Tribe rightly is trying to keep their Little Boys safe.

A supervisor who has been under scrutiny before for the negligence in October Perez' death allegedly in photos doing drugs with another worker. Also as a mandated reporter not reporting drug use and neglect of a child in her own family. Results...a long paid vacation and back to work which to me seems to be a cover up.

After numerous reports to the Kalispell CPS from over ten neighbors, friends, family members and a principal, Autumn Hawk is burned alive in a drug manufacturing motor home. Her parents are stoned out of their minds but not a scratch on them and back on the property cooking again (allegedly of course). The crime scene was compromised, investigators intimidated witnesses and now it is quietly being swept under the rug.

Where's the federal money? Money from foster care missing? (Please don't off me for mentioning that. I have live grandchildren that I want to see graduate and I'm only 61).

A caseworker in Boulder molesting a young relative. Who hired that guy?

There's more those are my faves. The recent audit? The committee couldn't even get Oppen to stay in the room. He didn't know the answers to important questions that concern the lives of children. He was snotty, arrogant and when someone finally got him back in where he should have been was overheard saying they called him in not to ask questions but to make their point. He actually embarrassed us in front of the auditors who were very professional. Sarah was worse. She came in just to speak and actually argued with the

committee head on a fact that was obvious to everyone else in the room. She along with Oppen were not prepared as if they hadn't even studied the results. The audience was snickering as it was like a Laurel and Hardy skit. I truly feel Richard should go back to his former job of testing well samples and Sarah shouldn't be in charge of the lives of our children!

Doesn't this bother you Governor Bullock? These people reflect you and if you're trying to cover this killing of our Children up by keeping these clowns in their positions to get elected next year it's really not working. It's only making it more obvious that you're not in control of this department for sure and that makes us believe you need to be replaced next November by a good leader who cares about our Montana Children.

So I hope you rethink these goofy decisions you've been making concerning our Children lately. It's not helping you and we've kind of shown everyone that this agency is a mess. These Legislators know. The people we tell these stories to are learning why you may not be suitable to run our state if you can't even keep its Children alive!

Sorry this is so long but the more mistakes you make the more I write about but I want to close with this:

The first Presidential Election I voted in, I voted for Hubert H. Humphrey. I carried a sign for him. I shook his hand and he thanked me. I have been a Conservative for many years but I vote for the Man, not the office. I even voted for you! But from my experience as a Child Advocate in the Great State of Montana I have come to call home and love, I will never, never vote for another Democrat as long as I live unless it's a family member who will be a righteous person. That can be part of your legacy, Steve. Put that in your book as you, sir are a Dangerous Man.
